Fundamentals: OOP | Algorithms | Data Structures | Design Patterns | Git

BACK-END : Express | NodeJS | NestJS

FRONT-END : ReactJS | Redux | Javascript | HTML | CSS | Materialize | Webpack

DevOps: Docker

Cloud Computing: Azure

EXPERIENCE

Junior Back-end Developer

WonderTech

📅 06/2023 - 01/2024

Renowned tech startup in Karachi focusing on innovative solutions.

- Built 2 separate back-end modules of a robust EdTech mobile application that empowered parents to find suitable tutors and schedule tutoring sessions and monitor their child's learning progress.
- Implemented RESTful APIs for 20 functionalities using the MVC architecture ensuring scalability, maintainability, and optimized performance across the application.
- Designed and developed relational database schema of the whole app consisting of 17 tables.
- Utilized Node.js and Express for back-end development, integrated MySQL with Sequelize ORM for efficient database management, and ensured smooth deployment using Git and cPanel.

Python
Proficient

C
Intermediate

PROJECTS

Final Year Project

📅 01/2023 - 05/2023

X-Ray Auto Reporting System in Collaboration with Indus Hospital, Pakistan.

- Spearheaded the development of a deep-learning based chest X-ray auto-reporting system aimed at revolutionizing diagnostic processes.
- Achieved 98% accuracy using ResNet-50 in detecting key abnormalities on chest X-rays for detecting pneumonia.

Portfolio Website

📅 01/2023 - 01/2023

Responsive portfolio website for startup.

- Launched a fully responsive and scalable React-based portfolio website for a cloud-based startup, within 30 days.
- Ensured compatibility across 20+ device models and browsers.

Fun2Learn Web Project

📅 01/2023 - 05/2023

Fun2Learn Web Project aimed at enhancing educational experience for kids.

- Spearheaded a group of 3 in building a full-stack web application for kids aged 5-7.
- Ideated and implemented interactive features for logging and tracking kids' progress through lessons and quizzes.

Cloud Computing Projects

📅 01/2023 - 05/2023

Projects completed during the 'Intro to Cloud Computing' course.

- Led a team of 3 to integrate Azure Blob Storage as a CDN in the final year project.
- Developed a Power Platform application incorporating Power Automate and SharePoint.
